

The William Alvey school

Allergen and Anaphylaxis Policy

This policy was adopted by the full governing body at their meeting on the 20th July 2026. This policy will be reviewed annually by the HT.

Contents:

Statement of intent

The William Alvey School strives to ensure the safety and wellbeing of all members of the school community. We do this to align with our whole school vision which is based on everyone reaching their full potential and living a 'life in all its fullness' (John 101:10). For this reason, this policy is to be adhered to by all staff members, parents and pupils, with the intention of minimising the risk of anaphylaxis occurring whilst at school.

In order to effectively implement this policy and ensure the necessary control measures are in place, parents are responsible for working alongside the school in identifying allergens and potential risks, in order to ensure the health and safety of their children.

The school does not guarantee a completely allergen-free environment; however, this policy will be utilised to minimise the risk of exposure to allergens, encourage self-responsibility, and plan for an effective response to possible emergencies.

1. Legal framework

This policy has due regard to all relevant legislation and guidance including, but not limited to, the following:

- Children and Families Act 2014
- The Human Medicines (Amendment) Regulations 2017
- The Food Information (Amendment) (England) Regulations 2019 (Natasha's Law)
- Benedict's Law/DfE guidance
- Department of Health 'Guidance on the use of adrenaline auto-injectors in schools'
- DfE 'Supporting pupils at school with medical conditions'
- DfE 'Allergy guidance for schools'

This policy will be implemented in conjunction with the following school policies and documents:

- Health and Safety Policy
- Supporting Pupils with Medical Conditions Policy
- Educational Visits and School Trips Policy
- Allergen and Anaphylaxis Risk Assessments

2. Definitions

For the purpose of this policy:

Allergy – is a condition in which the body has an exaggerated response to a substance. This is also known as hypersensitivity.

Allergen – is a normally harmless substance that triggers an allergic reaction for a susceptible person.

Allergic reaction – is the body's reaction to an allergen and can be identified by, but not limited to, the following symptoms:

- Hives
- Generalised flushing of the skin

- Itching and tingling of the skin
- Tingling in and around the mouth
- Burning sensation in the mouth
- Swelling of the throat, mouth or face
- Feeling wheezy
- Abdominal pain
- Rising anxiety
- Nausea and vomiting
- Alterations in heart rate
- Feeling of weakness

Anaphylaxis – is also referred to as anaphylactic shock, which is a sudden, severe and potentially life-threatening allergic reaction. This kind of reaction may include the following symptoms:

- Persistent cough
- Throat tightness
- Change in voice, e.g. hoarse or croaky sounds
- Wheeze (whistling noise due to a narrowed airway)
- Difficulty swallowing/speaking
- Swollen tongue
- Difficult or noisy breathing
- Chest tightness
- Feeling dizzy or faint
- Suddenly becoming sleepy, unconscious or collapsing
- For infants and younger pupils, becoming pale or floppy

3. Roles and responsibilities

The governing board is responsible for:

- Ensuring that policies, plans, and procedures are in place to support pupils with allergies and those who are at risk of anaphylaxis and that these arrangements are sufficient to meet statutory responsibilities and minimise risks.
- Ensuring that the school's approach to allergies and anaphylaxis focusses on, and accounts for, the needs of each individual pupil.
- Ensuring that staff are properly trained to provide the support that pupils need, and that they receive allergy and anaphylaxis training at least annually.
- Monitoring the effectiveness of this policy and reviewing it on an [annual](#) basis, and after any incident where a pupil experiences an allergic reaction.

The headteacher is responsible for:

- The development, implementation and monitoring of this policy and related policies.
- Ensuring that parents are informed of their responsibilities in relation to their child's allergies.
- Ensuring that all relevant risk assessments, e.g. to do with food preparation, have been carried out and controls to mitigate risks are implemented.
- Ensuring that all designated first aiders are trained in the use of adrenaline auto-injectors (AAIs) and the management of anaphylaxis.
- Ensuring that all staff members are provided with information regarding allergic reactions and anaphylaxis, including the necessary precautions and how to respond.
- Ensuring that catering staff are aware of pupils' allergies and act in accordance with the school's policies regarding food and hygiene, including this policy.

The SENDCO/Office staff are responsible for:

- Ensuring that there are effective processes in place for medical information to be regularly updated and disseminated to relevant staff members, including supply and temporary staff.

- Seeking up-to-date medical information about each pupil via a medical form sent to parents on an annual basis, including information regarding any allergies.
- Contacting parents for required medical documentation regarding a pupil's allergy.

All staff members are responsible for:

- Attending relevant training regarding allergens and anaphylaxis.
- Being familiar with and implementing pupils' individual healthcare plans (IHPs) as appropriate.
- Responding immediately and appropriately in the event of a medical emergency.
- Reinforcing effective hygiene practices, including those in relation to the management of food.
- Monitoring all food supplied to pupils by both the school and parents.
- Ensuring that pupils do not share food and drink in order to prevent accidental contact with an allergen.

All parents are responsible for:

- Notifying the school of their child's allergens, the nature of the allergic reaction, what medication to administer, specified control measures and what can be done to prevent the occurrence of an allergic reaction.
- Keeping the school up-to-date with their child's medical information.
- Providing the school with written medical documentation, including instructions for administering medication as directed by the child's doctor.
- Raising any concerns they may have about the management of their child's allergies with the classroom teacher.

All pupils are responsible for:

- Ensuring that they do not exchange food with other pupils.
- Avoiding food which they know they are allergic to, as well as any food with unknown ingredients.

- Notifying a member of staff immediately in the event they believe they are having an allergic reaction, even if the cause is unknown, or have come into contact with an allergen.

4. Food allergies

Parents will provide the school with a written list of any foods that their child may have an adverse reaction to, as well as the necessary action to be taken in the event of an allergic reaction, such as any medication required.

Information regarding all pupils' food allergies will be collated, indicating whether they consume a school dinner or a packed lunch, and this will be passed on to the school's catering service. This will allow our catering and school staff to make bespoke accommodations for pupils. This also allows all relevant staff to have the knowledge to follow the clear processes we have in school to identify pupils with specific dietary requirements and to keep them safe.

5. Food allergen labelling

The school hires a private catering firm to prepare meals. They have their own legally compliant processes to ensure food allergen labelling rules for pre-packed food goods are met.

School staff ensure they are aware of the needs of relevant children and adhere to their medical needs.

6. Animal allergies

Pupils with known allergies to specific animals will have restricted access to those that may trigger a response.

In the event of an animal on the school site, staff members will be made aware of any pupils to whom this may pose a risk and will be responsible for ensuring that the pupil does not come into contact with the specified allergen.

The school will ensure that any pupil or staff member who comes into contact with the animal washes their hands thoroughly to minimise the risk of the allergen spreading.

7. Seasonal allergies

The term 'seasonal allergies' refers to common outdoor allergies, including hay fever and insect bites.

Precautions regarding the prevention of seasonal allergies include ensuring that grass within the school premises is not mown whilst pupils are outside.

Pupils with severe seasonal allergies will be provided with an indoor supervised space to spend their break and lunchtimes in, avoiding contact with outside allergens.

Staff members will monitor pollen counts, making a professional judgement as to whether the pupil should stay indoors.

Pupils will be encouraged to wash their hands after playing outside.

Pupils with significant, known seasonal allergies will be encouraged to bring an additional set of clothing to school to change in to after playing outside, with the aim of reducing contact with outdoor allergens, such as pollen.

Staff members will be diligent in the management of wasp, bee and ant nests on school grounds and in the school's nearby proximity, reporting any concerns to the site manager.

The site manager is responsible for ensuring the appropriate removal of wasp, bee and ant nests on and around the school premises.

Where a pupil with a known allergy is stung or bitten by an insect, medical attention will be given immediately.

8. Adrenaline auto-injectors (AAIs)

Pupils who suffer from severe allergic reactions may be prescribed an AAI for use in the event of an emergency.

Under The Human Medicines (Amendment) Regulations 2017 the school is able to purchase AAI devices without a prescription, for emergency use on pupils who are at risk of anaphylaxis, but whose device is not available or is not working. In line with current guidance, the school has purchased appropriate, spare AAIs from a recognised pharmaceutical supplier.

Spare AAIs are stored as part of an emergency anaphylaxis kit.

Pupils who have prescribed AAI devices, and are over the age of seven, are able to keep their device in their possession. For pupils under the age of seven who have prescribed AAI devices, these are stored in a suitably safe and easily accessible location.

Spare AAIs are not located more than **five** minutes away from where they may be required. The emergency anaphylaxis kit can be found in the school office.

All staff have access to AAI devices, but these are out of reach and inaccessible to pupils – AAI devices are not locked away where access is restricted.

All spare AAI devices will be clearly labelled to avoid confusion with any device prescribed to a named pupil.

In line with manufacturer's guidelines, all AAI devices are stored at room temperature in line with manufacturer's guidelines, protected from direct sunlight and extreme temperature.

Mrs Lee (DHT) and the front office staff are responsible for maintaining the emergency anaphylaxis kit.

The above staff members conduct a termly check of the emergency anaphylaxis kit(s) to ensure that:

- Spare AAI devices are present and have not expired.
- Replacement AAI's are obtained when expiry dates are approaching.

Any used or expired AAI's are disposed of after use in accordance with manufacturer's instructions.

Used AAI's may also be given to paramedics upon arrival, in the event of a severe allergic reaction, in accordance with this policy.

Expired AAI's are disposed of via a local pharmacy.

Where any AAI's are used, the following information will be recorded on the AAI Record:

- Where and when the reaction took place
- How much medication was given and by whom

9. Access to spare AAI's

A spare AAI can be administered as a substitute for a pupil's own prescribed AAI, if this cannot be administered correctly, without delay. This will only happen in an emergency situation and where the outcome of no action would, in that moment, be worse than no action.

10. School trips

The headteacher will ensure a risk assessment is completed when allergies are considered to be serious. Decision making will be informed by relevant medical evidence and discussions with

parents as necessary. The headteacher has the final say on whether a risk assessment will be completed in these circumstances.

Adults will be available to support the pupil at all times during a school trip.

If the pupil has been prescribed an AAI, adults trained in administering the device will attend the trip. The pupil's medication will be taken on the trip and stored securely – if the pupil does not bring their medication, they will not be allowed to attend the trip.

A member of staff will be assigned responsibility for ensuring that the pupil's medication is carried at all times throughout the trip.

Spare pens will be taken on all trips where possible.

Where the venue or site being visited cannot assure appropriate food can be provided to cater for pupils' allergies, the pupil will take their own food or the school will provide a suitable packed lunch.

11. Medical attention and required support

If the diagnosed allergy/medical issue is serious, a meeting will be set up between the pupil's parents, the relevant classroom teacher, and any other relevant staff members, in which the pupil's allergies will be discussed and a plan of appropriate action/support will be developed.

Parents will provide the school with any necessary medication, ensuring that this is clearly labelled with the pupil's name, class, expiration date and instructions for administering it.

Pupils will not be able to attend school or educational visits without any life-saving medication that they may have, such as AAI's.

All members of staff involved with a pupil with a known allergy are aware of the location of emergency medication and the necessary action to take in the event of an allergic reaction.

Any specified support which the pupil may require will be outlined in their IHP.

All staff members providing support to a pupil with a known medical condition, including those in relation to allergens, will be familiar with the pupil's IHP.

Class teachers are responsible for working alongside relevant staff members and parents in order to develop IHPs for pupils with allergies, ensuring that any necessary support is provided and the required documentation is completed, including risk assessments being undertaken.

Our SENDCO has initial line management responsibility for ensuring that IHPs are implemented, monitored and written to an appropriate standard. Our SENDCO, with our headteacher, also makes the final decision on whether an IHP should be in place.

12. Staff training

All staff members will be trained in how to administer an AAI, and the sequence of events to follow when doing so.

Staff members will receive appropriate training and support relevant to their level of responsibility, in order to assist pupils with managing their allergies.

Other relevant training will be offered on a bespoke basis.

All staff members will:

- Be trained to recognise the range of signs and symptoms of an allergic reaction.
- Understand how quickly anaphylaxis can progress to a life-threatening reaction, and that anaphylaxis can occur with prior mild to moderate symptoms.
- Understand that AAI should be administered without delay as soon as anaphylaxis occurs.
- Understand how to check if a pupil is on the Register of AAI.
- Understand how to access AAI.
- Understand who the designated members of staff are, and how to access their help.
- Understand that it may be necessary for staff members other than designated staff members to administer AAI, e.g. in the event of a delay in response from the designated staff members, or a life-threatening situation.
- Be aware of how to administer an AAI should it be necessary.
- Be aware of the provisions of this policy.

13. Mild to moderate allergic reaction

Mild to moderate symptoms of an allergic reaction include the following:

- Swollen lips, face or eyes

- Itchy/tingling mouth
- Hives or itchy skin rash
- Abdominal pain or vomiting
- Sudden change in behaviour

If any of the above symptoms occur in a pupil, the nearest adult will stay with the pupil and refer to their IHP to determine appropriate next steps.

The pupil's parents will be contacted immediately if a pupil suffers a mild to moderate allergic reaction, and if any medication has been administered.

In the event that a pupil without a prescribed AAI, or who has not been medically diagnosed as being at risk of anaphylaxis, suffers an allergic reaction, a designated staff member will contact the emergency services and seek advice as to whether an AAI should be administered. An AAI will not be administered in these situations without contacting the emergency services.

For mild to moderate allergy symptoms, the pupil's IHP will be followed and the pupil will be monitored closely to ensure the reaction does not progress into anaphylaxis.

Should the reaction progress into anaphylaxis, the school will act in accordance with this policy. Where the pupil is required to go to the hospital, an ambulance will be called.

14.Managing anaphylaxis

In the event of anaphylaxis, the nearest adult will lay the pupil flat on the floor and try to ensure the pupil suffering an allergic reaction remains as still as possible; if the pupil is feeling weak, dizzy, appears pale and is sweating their legs will be raised. A designated staff member will be called for help and the emergency services contacted immediately. The designated staff member will administer an AAI to the pupil. Spare AAIs will only be administered if required in an emergency.

Where there is any delay in contacting designated staff members, the nearest staff member will administer the AAI.

If necessary, other staff members may assist the designated staff members with administering AAIs.

A member of staff will stay with the pupil until the emergency services arrive – the pupil will remain lying flat and still. If the pupil's condition deteriorates after initially contacting the emergency services, a second call will be made to ensure an ambulance has been dispatched.

The headteacher will be contacted immediately, as well as a suitably trained individual, such as a first aider.

If the pupil stops breathing, a suitably trained member of staff will administer CPR.

If there is no improvement after five minutes, a further dose of adrenaline will be administered using another AAI, if available.

In the event that a pupil without a prescribed AAI, or who has not been medically diagnosed as being at risk of anaphylaxis, suffers an allergic reaction, a designated staff member will contact the emergency services and seek advice as to whether an AAI should be administered. An AAI will not be administered in these situations without contacting the emergency services.

A designated staff member will contact the pupil's parents as soon as is possible.

Upon arrival of the emergency services, the following information will be provided:

- Any known allergens the pupil has
- The possible causes of the reaction, e.g. certain food
- The time the AAI was administered – including the time of the second dose, if this was administered

Any used AAI's will be given to paramedics.

Staff members will ensure that the pupil is given plenty of space, moving other pupils to a different room where necessary.

Staff members will remain calm, ensuring that the pupil feels comfortable and is appropriately supported.

A member of staff will accompany the pupil to hospital in the absence of their parents.

If a pupil is taken to hospital by ambulance, two members of staff will accompany them.

A copy of the Register of AAI's will be held in the front office.

Following the occurrence of an allergic reaction, the SLT, will review the adequacy of the school's response and will consider the need for any additional support, training or other corrective action.

15. Monitoring and review

The headteacher is responsible for reviewing this policy annually.

The effectiveness of this policy will be monitored and evaluated by all members of staff. Any concerns will be reported to the headteacher immediately.

Following each occurrence of an allergic reaction, this policy and pupils' IHPs will be updated and amended as necessary.

Pupil allergy declaration form

Name of pupil			
Date of birth		Year group	
Name of GP			
Address of GP			

Nature of allergy	
Severity of allergy	

Symptoms of an adverse reaction

Details of required medical attention

Instructions for administering medication

Control measures to avoid an adverse reaction

Spare AAls

I understand that the school has spare AAls to be used in the event of an emergency allergic reaction.
